

Sieve sleeve plastic IOV M6-M8 (12X80)

SORMAT CODE 9640072614

Don't waste a drop. Sieve sleeves help to control resin volume

- Plastic and metal sieve sleeves are designed to control ITH resin volume in anchoring to hollow and perforated base materials, such as perforated clay bricks.
- Just choose the correct size sleeve based on the stud or rebar diameter you are going to use.

APPLICATIONS

- For injection resins

Technical data

INSTALLATION DETAILS

Size	M6-M8	Drill hole diameter (d ₀) Ø	12
Length (L)	80		

PRODUCT OVERVIEW

Other codes	/
Material	Polypropylene
Packages	box (bag): 50 / outer carton: 200
Weight	1.4 kg / 1000

BASE MATERIALS

- ALSO SUITABLE FOR
- Hollow light expanded clay aggregate block
 - Hollow sand-lime block
 - Hollow-core slab
 - Perforated clay block
 - Perforated clay brick
 - Perforated sand-lime brick
